

Stud Requesting
AB Approval

(If multiple owners, please include all owner herd numbers)

Animal Name

Animal
Herdbook No.

Tick box for the type of AB approval required

AB sire Approved "YES" – eg. for semen marketed to other breeders for registered progeny

AB sire "RESTRICTED" – eg. for semen used within herd ONLY *if section A, clause (e) is applicable, list herds

If you are an owner and/or owner of a sire from which you have collected semen for the purpose of breeding registerable calves, that sire MUST be recorded as an NZ Herefords Artificial Breeding (AB) Sire.

The Sire must be listed as an 'AB Approved' or 'AB Restricted' on Internet Solutions, so the breeder who used the semen can register their calves by him.

To list the sire as a pedigree 'AB' sire, complete the sire details below and confirm he meets the NZH AB Sire regulations by using the following checklist.

Checklist (please tick):

min 50K SNP DNA profile

Tested for Hy/DI/IE/MSUD/DB/MD genetic conditions and declared free

Correct Sire Verification

Acknowledgment that a \$106+GST AB Approved Sire fee will be charged to my NZH account (can be split between multiple owners) or \$22+GST for AB Sire "Restricted"

I grant permission to share the DNA profile of the sire listed on this form with breeders using his semen. I understand that this information may be shared between DNA service providers, approved by NZ Herefords/PBB, for the purposes of progeny registration and parentage verification.
