
If you are an owner and/or owner of a sire from which you have collected semen for the purpose of breeding registerable calves, that sire MUST be recorded as an NZ Hereford AI Sire.

The Sire must be listed as an 'AI Approved' or 'AI Restricted' on Internet Solutions, so the breeder who used the semen can register their calves by him.

To list the sire as a pedigree "AI" sire, complete the sire details below and confirm he meets the NZH AI Sire regulations by using the following checklist.

Tick box for the type of AI approval required:

- AI sire Approved "YES" – eg. for semen marketed to other breeders for registered progeny
- AI sire "RESTRICTED" – eg. for semen used within herd ONLY *if section A, clause (e) is applicable, list herds

Stud Requesting AI Approval: _____
(If multiple owners, please include all owner herd numbers)

Animal Name: _____

Animal Herbook No: _____

Tick boxes to check:

- min 50K SNP DNA profile
- Tested and declared FREE for all known genetic conditions for which there is a commercial test
- Correct Sire Verification
- Acknowledgement that a \$100+GST AI Approved Sire fee will be charged to my NZH account (can be split between multiple owners) **OR** \$20.00+GST for AI Sire "Restricted"
- I agree that I have read and understand the following NZH Rule
http://www.herefords.co.nz/cms_files/content2018/2018rules_2%20rules%20and%20regulations%20-%20conditions%20of%20entry%20updated%20november.pdf regarding AI Sire registration (this needs to be compulsory)
